EDUCATION

University of Engineering and Management

Bachelor of Technology in Computer Science Engineering

Kolkata, India

Aug. 2022 – Present (Expected: 2026)

EXPERIENCE

Full Stack Developer

CloudFixMedia

June 2024 – Present

Kolkata

- Implemented a client communication system, improving engagement and response times.
- Engineered a full-stack web application using React, Node.js, MongoDB, and Docker to create a seamless client interaction platform.

DSA Instructor

Edzie

August 2023 – July 2024

Kolkata

- Guided 2 batches of 20+ students in their DSA learning.
- Improved students' logic building and problem-solving skills.
- Explored diverse methods to mentor learners, leveraging the support of teaching assistants.
- Developed teamwork skills and gained in-depth knowledge of organizational management.

PROJECTS

Hindsvaasthseva | React, Tailwind, REST API

December 2024 – Present

- Developed a platform for healthcare providers to manage patient data efficiently.
- Enabled users to access their medical history for improved diagnosis.
- Provided users with the convenience of booking appointments with nearby doctors.
- Implemented a feature for users to estimate treatment costs.

PuroTaja | Flutter with Get X and Dio, REST API, Git

November 2024 – Present

- Built a cross platform quick-commerce application that sells fish in multiple local areas .
- PuroTaja made it easy to focus on higher sales for a fish seller in few local areas.

AttendMe | Flutter, Firebase Database, Dart based backend, Git

December 2023 – February 2024

- Developed an attendance management system accessible to both students and teachers.
- Designed a 'scan and attend' feature enabling quick attendance tracking using QR code scanning.
- Enhanced security by verifying location with GPS and controlling developer mode and system settings.
